

Job Description: Sr Tools Engineer

Endless is an interactive storytelling company. Our innovative storytelling format puts the audience in control of the story. Think of it as a TV show, a video game and a choose-your-own-adventure book rolled into one.

We are seeking an experienced Sr Tools Engineer with a proven track record for architecting and developing high-quality tools for game development. You will join a team of talented engineers working with writers, narrative designers and artists to encode their artistic expression and provide automation of our narrative toolkit. Tools will be developed on top of Unity as well as through our backend services which provide additional narrative, automation and reporting capabilities.

This position is for on-site at our Oakland office.

Primary Responsibilities

- Work closely with talented creatives to analyse their process and develop proposals to improve efficiency through tools and automation
- Design, build and own key systems in our content creation workflow
- Build out tools on top of Unity in our custom narrative toolset, primarily in C#
- Coordinate with backend development team on technical integrations
- Ongoing support for existing tools and platform
- Assist in developing project plans and schedule, and then deliver against those commitments.

Requirements

- B.S. degree in Computer Science or equivalent experience
- 5+ years professional gaming experience is required
- 3+ years of profession game development experience focused on tools including at least some development experience in Unity
- Professional experience using C++ or C#
- Passionate about collaborating with creatives, analyzing workflows and designing user-focused tools

Pluses

- Experience working with web-based tools using javascript
- Experience with mobile F2P games
- Expertise in Game Design and/or User Experience Design
- Passion for narrative and storytelling

Compensation

- Competitive Salary
